

# HCC-95

## Strain Information

Cat. NO.	NM-F22
Cell Line	HCC-95
Strain State	Validation of tumorigenic capacity completed
Model Description	HCC-95 is a human non-small cell lung cancer (NSCLC), squamous cell carcinoma cell line.
	*Literature published using this strain should indicate: HCC-95 cell line (Cat. NO. NM-F22) was purchased from Shanghai Model Organisms Center, Inc..

## Validation Data

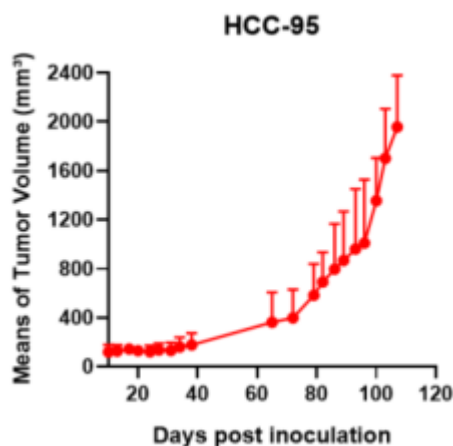

Figure 1. Tumor growth curve of HCC-95 xenograft model (n=5)

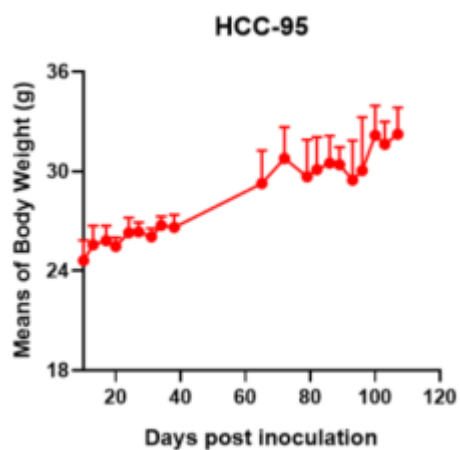

Figure 2. Body weight change of HCC-95 xenograft model (n=5)

\*Wild-type cell lines are not for sale, and only applied to construction of tumor bearing mice and in-vivo efficacy studies.
