

Tnc-Flox

Nomenclature	C57BL/6Smoc- <i>Tnc</i> ^{em1(flox)Smoc}
Cat. NO.	NM-CKO-233220
Strain State	Sperm cryopreservation

Gene Summary

Gene Symbol Tnc	Synonyms	TN; Hxb; Ten; TN-C; AI528729; cytotactin; tenascin-C; C130033P17Rik
	Chromosome	4
	NCBI ID	21923
	MGI ID	101922
	Ensembl ID	ENSMUSG00000028364
	Human Ortholog	TNC

Model Description

These strains carry loxP sites flanking exon2 of Tnc gene. When crossed with a Cre recombinase-expressing strain, this strain is useful in eliminating tissue-specific conditional expression of Tnc gene.

*Literature published using this strain should indicate: Tnc-Flox mice (Cat. NO. NM-CKO-233220) were purchased from Shanghai Model Organisms Center, Inc..

Validation Data
